

Dear Constituent,

Every year the Appropriations Committee on which I serve sets aside funding for local projects. Each Member of Congress participates in directing these funds to their Congressional districts.

Project requests from constituent groups are an important connection between national and local interests. Significant developments are made possible by bringing much needed federal dollars to a project that would otherwise be impossible to complete.

I direct my top priorities to projects that provide for economic development, improved health care, better education, and renewable energy.

On this page is a list of projects that I have submitted for federal funding.

Sincerely,

Tim Ryan (OH-17)

Member of Congress
